Admissions are a very difficult process, both for institutions and parents. It is impractical for institutions to reach out to parents, who are equally confused and are desperately looking for suitable educational providers for their children. Keeping in mind, the problems faced by both parties, we have developed a website and mobile application, wherein the mammoth task of finding suitable institutions becomes much easier for an eligible candidate.

Right Admission Plus helps find better schools, colleges, universities, institutes and tutors for your children, to enable their bright future. Explore a comprehensive list of Indian institutions and programmes, all in one place. You will also be able to access career opportunities and personal counseling for students.

In addition to providing suitable admissions, we have also attached you to available vendors for providing all kinds of institutional requirements for day to day purpose like books, stationary, uniforms, printing and advertisement materials and digital marketing needs etc.

Right Admission Plus has an efficient and smooth management system, further accessible through the mobile application, which can be used to manage and understand the institute digitally. The Institute Management System(IMS) is very useful for both educational institutes as well as parents and students.

Right Admission Plus Advantages

Free School Management Software
worth of ₹ 80000
